

# Home Ignition Zone Preparation Checklist

- Remove all flammable materials during fire season

- Clear debris from the roof, gutters, and under the porch

- Harden your home structure against fire

## IMMEDIATE ZONE 0-5 ft

- Create breaks in vegetation with patios, flowerbeds, and walkways

- Cut back overgrown areas, especially beneath trees, and remove ladder fuels

- Prune trees so lowest branches are 6-10 ft above the ground and keep tree canopies at least 10 ft away from the house

## INTERMEDIATE ZONE 5-30 ft

- Clear debris from the ground and reduce dead plants, trees, and leaves

- Keep the space between large, mature trees clear of smaller trees

- Ensure at least 12 ft between tree canopies within 60 ft of the house, and at least 6 ft of space between trees 60+ ft from the house

- If there are any outbuildings in the Extended Zone, keep them clear of plants and vegetation

## EXTENDED ZONE 30+ ft
